Product Details

15 oz. PET BLOCKOUT Banner is a reinforced banner material manufactured with a blockout layer of PET film in the center and PVC laminated to the front and back. This **15 oz. blockout banner** is engineered to achieve 100% opacity to blockout images on the reverse side or image washout due to lighting behind the sign. As it is an anti-curl banner material, this media is the best choice for indoor **double-sided display graphics** applications where a super smooth image is required for high-end and close-up viewing.

Popular applications for this **15 oz. blockout material** include banner stands and roll-up displays where full bleed printing without curl is required. The **PET banner material** can also be produced with one-side PVC laminated for lighter and economy purpose. The **13oz grey back PET banner** can be printed 1 side.

Regularly, there are 2 layers of **PET film** in the middle, **double side PVC**, makes the total weight 15oz; if one side PVC, the weight would be 13oz; the most **economic PET banner** is 1 layer PVC + 1 layer PET, the weight would be 10oz.

DER New Material is one of the leading China 15 oz. pet double sided banner material manufacturers and suppliers, with professional factory, we are able to produce high-quality 15 oz. pet double sided banner material at competitive price, and we can always offer you products for sale.
