PET Anti-Curl Banner

DERFLEX has unveiled new **flexible banner materials** for digital printing. These new carriers open a whole new world to interior design and indoor advertisement. They meet flame-retardant standards for homes, offices or other assembly places.

DHPET330 is a **decorative banner** that is both strong and very flexible for indoor advertisement. It can be papered onto any surface or it can be used as a frontlit with eyelets. It is M1 certified and weighs 280 gr. The slightly embossed surface feels soft and is composed of PVC and PET. Available in 50-meter rolls on widths of 130 up to 220 cm.

DSPET530 is a **semi rigid banner** that looks like paper, feels like paper but is many times stronger than paper. The banner is M1 certified and is very suitable for indoor applications. This is a green product without phthalates nor solvents. Because of the smooth surface, colors are vivid and shiny. Very suitable for any interior decoration application such as separation walls, lamps, and doors.

Super Smooth PET Blockout is a 15-oz. smooth, scrimless, **blockout banner material**. This media is engineered primarily for indoor use and has a no curl formula giving it a lay-flat appearance without having to use hemming tapes. It is best suited for double sided signs and banners that hang or are installed in banner stands.

DER New Material is one of the leading China anti-curl pet banner material manufacturers and suppliers, with professional factory, we are able to produce high-quality anti-curl pet banner material at competitive price, and we can always offer you products for sale.
