Product Details

Fiber glass tarpaulin , because of its no curling character, is a good material used for making the **window curtains**.

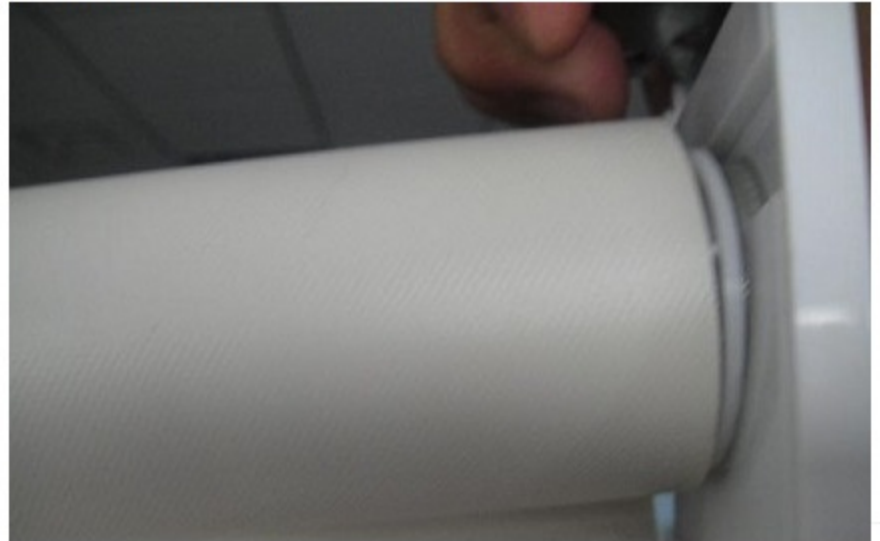

Blockout Fiber glass tarpaulin main structure: PVC layer(white) + PVC layer(black) + fiber glass fabric layer + PVC layer(white).

Compared with normal **PVC blockout tarpaulin**, **Fiber glass blockout tarpaulin** has the following advantages:

1. No curling, fiber glass fabric is more rigid, which promise a more flat edge of the curtain.
2. Long life durance, fiber glass would not be corroded during using
3. **Blockout**, with black layer inside, can keep the sunshine out.
4. **Flame Retardent**, Fiber glass tarpaulin has better performance on flame retardent than the **PVC coated polyester**
