

## Flexible Mining Ventilation Fabric Canavs

PVC coated tarpaulin is used in mining industry for ventilation system. There are plenty of Combustible gas in the mining field. the strict envirenment give out more requirements to the PVC tarpaulin rolls, which is used to produce the flexible ventilation tube. 1. Flame Retardent. DERFLEX makes PVC tarapulins to 100% match the B1 FR standard 2. Anti-static. Anti-static tarpaulin can prevent the tarpaulin from bringing out fires by itself. 3. Good flexibility. The ventilation tube can reach any places in the mining fields 4. Anticorrosion and anti-midrew. These characters makes the tarpaulin more life durance after installation

### Product Details

**PVC coated tarpaulin** is used in mining industry for **ventilation system**. There are plenty of Combustible gas in the mining field. the strict environment give out more requirements to the **PVC tarpaulin rolls**, which is used to produce the **flexible ventilation tube**.

1. Flame Retardent. DERFLEX makes **PVC tarapulins** to 100% match the **B1 FR** standard
2. Anti-static. **Anti-static tarpaulin** can prevent the tarpaulin from bringing out fires by itself.
3. Good flexibility. The ventilation tube can reach any places in the mining fields
4. Anticorrosion and anti-midrew. These characters makes the tarpaulin more life durance after installation

DERFLEX is professional manufacturer in China focusing on **PVC tarpaulin material**, with experience over 15 years.

PVC coated tarpaulin material

PVC tarpaulin 18oz

mining ventilation system

ventilation tube for mining industry

DERFLEX main **tarpaulin material** products for mining industry:

DG1122: 1000D\*1000D, 20\*20, 610gsm

DG1188: 1000D\*1000D, 18\*18, 610gsm

DG1330: 1000D\*1000D, 30\*30, 900gsm
