Product Details

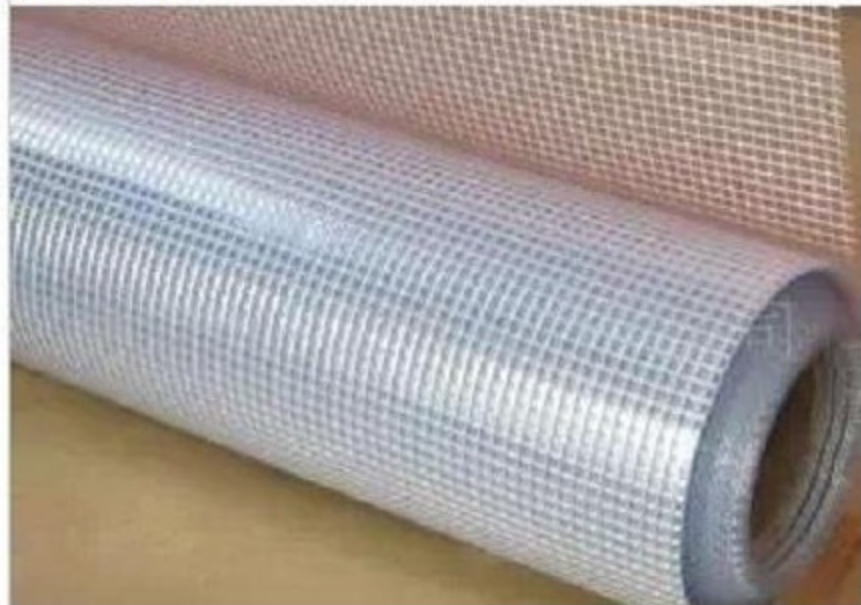

Liquid Chemicals Packaging Tarpaulin is used to produce chemical bags. **PVC tarpaulin** is widely used in packaging industry. for different chemical, there are different requirements of **PVC tarpaulins**

DERFLEX has been producing **PVC tarpaulin rolls** since 1997. For making chemicals packaging, the tarpaulin should have the following features:

- Good tearing and tensile strength.
- Compatible with the chemicals
- waterproof and oil proof
- anti-acid and Alkali resistance

Before **PVC tarpaulin roll material** application into the chemical packaging industry, there would be many tests:

- Drop test
- Airtight test
- Hydraulic test
- Stacking Test
- Permeability test
- Liquid tight seal test
