Product Details

'ONE-WAY VISION' VINYLs FOR WINDOW GRAPHICS - 1 YEAR PERFORATED SIGN VINYLs

Suitable for UV, latex and solvent printers.

A 160μ **white perforated monomeric vinyl** with 1.6mm holes, a black reverse side and a semi-permanent adhesive and film liner for UV or solvent printing.

Vinyl to hole ratio is 55:45 making it better for mid-range viewing.

External applications Window graphics onto flat glass surfaces showing advertising on one side and allowing for "see through" view on the other side.

Internal applications

Thanks to one-way visibility, DMT8100 can be used for surveillance purposes in shops, department stores, stocks, etc...

SHELF LIFE

1 year when stored at 15 to 25°C and ± 50 % relative humidity (in the original packaging).

EXPECTED DURABILITY

The expected vertical outdoor durability of the unprocessed product in Central Europe (Zone 1) is up to 1 year. This information is based on successful real-life experience and artificial aging according to ISO4892-3. Note : Over lamination of the inkjet printed material delays eventual color fading that may occur upon time. This color fading is dependent from the quality of the inkjet inks, the orientation of the printed material, the angle of display and the exact location of exposure on the Globe.

DER New Material is one of the leading China one-way vision vinyls for window graphics manufacturers and suppliers, with professional factory, we are able to produce high-quality one-way vision vinyls for window graphics at competitive price, and we can always offer you products for sale.
