## Perforated Vinyl Banners For Digital Printing

the mesh pattern brings the weight down to 8oz, which makes larger sizes easy to handle. Perforated Vinyl Banners are ideal for storefronts and locations where you don't want visibility to be completely covered but you want a full display from the outside. Print perforated vinyl banners for vehicles too - you'll be able to see perfectly from the inside and get a nice display from the outside.

Perforated Vinyl Banners for Business

If you need a **Mesh Banner** that will be used outdoors for a long time, especially stretched between any two poles in windy conditions, our Custom **Mesh Vinyl Banners** are a perfect choice for trouble-free use. The perforated nature of the **Mesh Vinyl** allows for wind to easily pass through without catching in the banner and prematurely damaging it. Another cool feature of Mesh is its semi translucent quality, that allows you to partially see through it. In addition to air, **perforated Mesh** lets more light and sound pass through as well.

Made from the same strong vinyl material as our **13oz Banners** there's no compromise in strength; the mesh pattern brings the weight down to 8oz, which makes larger sizes easy to handle. **Perforated Vinyl Banners** are ideal for storefronts and locations where you don't want visibility to be completely covered but you want a full display from the outside. Print **perforated vinyl banners** for vehicles too - you'll be able to see perfectly from the inside and get a nice display from the outside.
