Product Details

Vinyl banner, also called PVC banner, frontlit, backlit, etc., after vinyl banner printing is widely used for outdoor advertising.

Product Application

Vinyl banners are widely used for vinyl outdoor banners, backlit vinyl banner, light box, etc...mesh vinyl banner is used especially in sea town, where is windy area.

Product Advantage

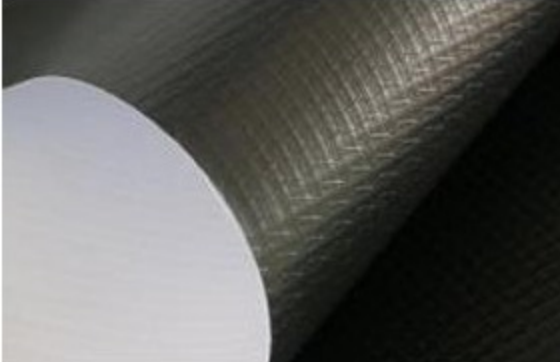

Outdoor vinyl banner is made up of PVC + polyester fabric + PVC. 13 oz vinyl banner material is the most popular outdoor vinyl banners. DERFLEX vinyl banner material is more competitive among vinyl banner manufacturers in China:

1. Cheap vinyl banner: better control in the production cost, makes more competitive price.
2. Whole production line for PVC vinyl banners: with calendars, lamination machines in factory, we make our own PVC film, and do final lamination or coating. This would lower the cost in wholesale vinyl banners.
3. Consistent quality assurance: For every production, DERLFEX would keep at least 5 meters production samples, for 2 years. If there is any complaint, we would easily found out the problem.
4. Better control in every details: No fabric comes out of the PVC, even the edge is 100% smooth; No skip thread in the polyester fabric; full size in the roll length, gram; etc...
5. DERFLEX accept any new suggestions to make products more suitable for the target market.
